Abdulrahman Emad Fathy

Software QA Engineer

abdulrahmanemadfathy@gmail.com +20 112 699 8251 Egypt linkedin Github

PROFILE

Software QA Engineer experienced in **Manual Testing, API Testing, SQL, and Selenium Automation** with hands-on experience designing test cases, validating backend systems, and building scalable automation frameworks. Proficient in test case design, defect reporting, and regression testing across web applications, with practical exposure to **Postman, SQL Server, and Selenium WebDriver with Java, TestNG, and the POM** design pattern. Collaborative team player who has led QA teams and delivered projects under Agile/Scrum workflows.

PROJECTS

Completed the Software Testing track of the Digital Egypt Pioneers Initiative (DEPI); the OpenCart project below was developed as the program's graduation project.

OpenCart E-Commerce QA Audit GitHub Link
Manual & Automation Testing — DEPI Graduation Project

- Led a 4-member QA team, managing task delegation and ensuring STLC milestones were delivered on schedule.
- Built a Selenium BDD framework using Java, Cucumber, and POM, automating 40+ regression test scripts.
- Performed Manual, API (20+ endpoints), and SQL testing, reporting 20+ defects and delivering TSRs through Jira.
- **Tech Stack:** Selenium WebDriver, Java, Cucumber (BDD), TestNG, POM, Postman, SQL, Jira.

Swag Labs Automated Testing Framework GitHub Link
Automation Testing Project

- Built a scalable Selenium automation framework using Java 17, TestNG, and the Page Object Model.
- Automated 32 end-to-end scenarios covering Authentication, Cart, and Checkout with improved execution stability.
- Organized TestNG suites and integrated ExtentReports to generate detailed HTML execution reports.
- **Tech Stack:** Java 17, Selenium WebDriver, TestNG, POM, ExtentReports.

Vegetable E-Commerce Platform
Manual Testing Project

- Analyzed SRS documents and executed 500+ manual test cases, identifying 65+ defects with 98% requirement coverage.
- Performed functional and cross-platform testing using Jira and Zephyr Scale across Web, Mobile, and Admin modules.
- Managed the complete defect lifecycle from reporting through regression verification, reducing pre-release issues by 30%.
- **Tech Stack:** Manual Testing, Jira, Zephyr Scale.

Social Entertainment App
Freelance — Manual Testing Project

- Executed manual testing during a one-month pre-release cycle, reporting defects across core application features.
- Conducted exploratory testing for chat and entertainment modules while creating 120+ detailed test cases in Excel.
- Documented and tracked 50+ high-severity defects with clear reproduction steps, reducing production-blocking bugs by 25%.
- **Tech Stack:** Manual Testing, Exploratory Testing, Excel.

Trello & Restful-Booker API Automation
API Testing Project

- Built Postman Collections and Environments to validate CRUD workflows across 60+ REST API endpoints.
- Automated Bearer Token authentication using JavaScript pre-request scripts with response assertions.
- Validated runtime variables, JSON schema, HTTP status codes, and 20+ boundary-value test scenarios.
- **Tech Stack:** Postman, JavaScript, REST API, JSON.

Blood Bank Management System GitHub Link

SQL Database Testing Project

- Designed a relational database from ERD for 8 core entities while enforcing referential integrity constraints.
- Developed 20+ advanced SQL queries using JOINs, GROUP BY, HAVING, and Stored Procedures for business validation.
- Performed backend database testing including constraint validation, boundary value analysis, and trigger verification.
- **Tech Stack:** SQL, SQL Server, ERD Mapping, Backend Testing.

TECHNICAL SKILLS

Manual Testing

- Experienced in Manual Testing, Functional Testing, Regression Testing, Smoke & Sanity Testing, UAT, Exploratory Testing, with solid knowledge of SDLC/STLC and Agile/Scrum methodologies.

API Testing

- Perform end-to-end API validation using Postman, including assertions, test scripts, and REST/JSON response validation across 20+ endpoints.

Automation Testing

- Develop and maintain UI test scripts using Selenium WebDriver, structuring projects with Java, TestNG, Cucumber (BDD), and Maven, and applying the POM design pattern.

Database Testing

- SQL and SQL Server — writing advanced queries with JOINs, GROUP BY, HAVING, and Stored Procedures for backend and data validation testing.

Tools & Methodologies

- Jira, Zephyr Scale, Git, GitHub, Git Flow, and Agile/Scrum workflows for version control and test management.

Soft Skills

- Analytical Thinking, Attention to Detail, Problem Solving, Team Leadership, Communication, and Time Management.

EDUCATION

B.Sc. Computer Science — AI Specialization

Beni-Suef University | Grade: Excellent

CERTIFICATES

DIGITAL EGYPT PIONEERS INITIATIVE (DEPI)

Software Testing Track — Completed

SOFTWARE TESTING BOOTCAMP

Eng. Tarek Roshdy — Manual Testing, API Testing, SQL

LANGUAGES

Arabic

Native language.

English

Professional working proficiency.
